

The Definitive eConsent Solution

SecureConsent (part of DrugDev) has been pioneering electronic systems for informed consent for global studies since 2005. Available on virtually any device, the solution makes the consenting process more efficient and effective for patients sponsors, sites and monitors. Originally founded as a learning management system, it combines a strong emphasis on education with the world-class SaaS technology of DrugDev's clinical operations suite to...

- Ensure patient understanding with engaging multimedia education
- Enable real-time remote monitoring and tracking into the global consent process
- Provide unprecedented insight into how patients read and understand documents
- Improve patient retention through increased comprehension and satisfaction
- Comply with global requirements (e.g. 21 CFR-Part 11, Annex 11, EU regulations)
- Eliminate common paper errors (e.g. wrong versions, bad signatures) with secure document management

Elegantly designed to focus attention with documents that are easy for all patients to read, the fully-validated eConsent solution uses explanatory videos, audio narration and glossary terms to put "informed" back into informed patient consent.

Why eConsent?

DrugDev's proven eConsent solution improves the experience for everyone in the trial by enabling them to...

Patients

Site Staff

Monitors

Sponsors

- View multimedia education with consistent ICF term explanations
- Flag areas of the document where they have questions to facilitate dialog with medical staff
- Better understand the risks and benefits of trial participation
- No longer manage different versions of paper documents
- Include all site-specific variables in the documents
- Receive alerts and track if/when subjects need to re-consent
- Check on a site consent status conveniently and remotely
- see only the information they have authority to view
- Have confidence that dates/times are always correct
- Rest assured of the integrity of the consent process
- Access useful analytics to track progress and identify trends
- Achieve better recruitment and retention rates

Problems Solved

- ✓ Inconsistent messaging
- ✓ Challenging language(s)
- ✓ No transparency/accountability
- ✓ Lack of auditable controls
- ✓ Frequent regulatory failures
- ✓ Version management/control
- ✓ Time-consuming and error-prone paper-based logistics
